Our Services

Invoice Audit & Recovery

Looking for immediate financial returns that will directly impact your bottom line? Our cutting-edge technology will sift through your weekly shipping invoice line-by-line and charge-by-charge to identify and recover all refunds.

Contract Optimization

Our team of experts has over 200 years of inside knowledge regarding carriers' margin-based pricing strategies. Our technology and expertise will help you renegotiate your UPS, FedEx, and/or LTL carrier agreement to best-in-class status. We'll manage the entire process so there's no time-requirement on your part.

Cloud-Based Reporting & Analytics

Shipware's state-of-the-art web portal transforms shipping data into dynamic charts with unique and intelligent drill-down capabilities. Our reporting and analytics technology empower shippers to make critical cost-saving decisions on the fly!

Our Team

The Shipware team consists of the most experienced and knowledgeable experts within their field to ensure maximum cost savings and value from your parcel and LTL carriers. We view each client as a vital partner and aim to establish long-term relationships by measuring our success through client satisfaction. We take pride in our near perfect customer retention.

Our Proprietary Technology

Krystal AI

The technology and intelligence behind our superior parcel and LTL savings.

Krystal is our artificial intelligence that combines the industry's most robust database with over 200 years of insider carrier pricing knowledge to generate customized data points and unique insights that will help you improve operations and optimize your carrier pricing.
